

TURN CONDITION MONITORING INTO YOUR NEXT GROWTH OPPORTUNITY

Build your business with proven technology and a global partner

SPM Instrument UK is seeking distributor partners in Northern Ireland and the Republic of Ireland. Our goal is to build a strong local network to represent, sell, and support our condition-based maintenance solutions.

PARTNER WITH US!

We are looking to collaborate with companies that already have a clear focus on condition-based maintenance (CBM), or that serve customers with a strong interest in reliability, asset performance, and predictive maintenance strategies.

Who we're looking for

Ideal partners will have

- an established presence in their local market
- an existing customer base
- a technical mindset and interest in advanced diagnostic solutions

What matters most

- Motivation to grow
- Ability to identify opportunities
- Willingness to engage and support customers

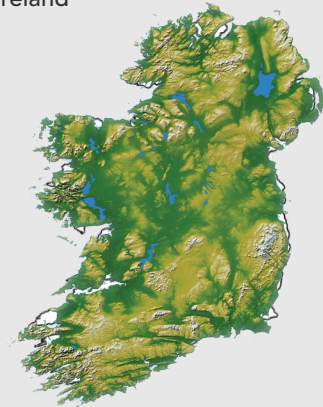

Who we are

The global SPM Group are thirteen subsidiary companies working closely together, combining local presence with shared expertise and innovation.

SPM Instrument UK, established in 1976 and based in Accrington, Lancashire, is a key part of this network. With an experienced and dedicated team, our company supports partners across the UK and Ireland with technical expertise, application knowledge, and responsive local service, helping to drive business growth in the condition monitoring market.

Together with our colleagues within the Group and our extensive global distributor network, we focus on long-term customer relationships, where we are an integral part of our customers' journey towards higher operational reliability, more efficient processes, and more profitable production.

Seeking partners in Northern Ireland and the Republic of Ireland

EXPERIENCE THAT BUILDS CONFIDENCE

We help industries reduce downtime, manage risk, and improve performance.

A global technology partner

SPM Instrument is a global leader in condition monitoring technology, with more than fifty years of experience helping industries improve machinery reliability and operational performance. Our solutions are designed to support the transition to predictive maintenance, enabling customers to reduce downtime, optimise asset performance, and make more informed maintenance decisions.

We provide a complete condition monitoring offering, covering everything from sensors and cabling, portable instrumentation, online systems, intelligent software, and training. This integrated approach allows partners to deliver scalable, high-value solutions tailored to a wide range of industries and applications.

Your growth opportunity

With SPM, you can:

- Expand from products to solutions
- Strengthen customer relationships
- Increase recurring business
- Access larger projects

You will be supported every step of the way. SPM Instrument UK provides training, application expertise, and technical support to help you confidently identify opportunities, engage customers, and deliver results. Together, we build the capability needed to grow your CBM business.

Full-range solutions

SPM solutions are designed for long service life and continuous value creation, helping companies reduce downtime risk, optimize critical processes, and improve decision-making across the organization.

We offer a complete portfolio for condition-based maintenance and process optimization:

- Patented HD measurement technology
- Portable and online measurement systems
- Wired and wireless sensors
- Diagnostics and analysis software
- Training in product use and vibration analysis
